

# Web3 Investment Guide

AI-driven Intelligent Investment Advisor

Accurately Capturing Alpha for an Outstanding Return

# What is **veDAO**?

veDAO is an AI-driven Web3 investment decision platform that utilizes big data analysis of sentiment indicators and on-chain/off-chain data to accurately capture Alpha opportunities, assisting users in achieving efficient investments and gaining benefits.

A vertical poster for the "veDAO Web3 Investment Guide". At the top is the veDAO logo. The title "veDAO Web3 Investment Guide" is in large, bold, white and blue text. Below the title is the subtitle "Accurately Capturing Alpha for an Outstanding Return" and "AI-driven Intelligent Investment Advisor". The poster features a target icon, a circular graphic with "on-chain signals" and "Social trends", and the text "Sniping Alpha". Three dark blue boxes with white text list key features: "Seize the opportunity and target the pain points of Web3 investments", "Massive project information display + Professional authoritative expert reviews", and "AI-powered fully intelligent investment advisory, analyzing strategies + automatic execution of instructions." The bottom section is titled "Contact us" and includes a QR code, website URL (www.vedao.com), Telegram link (https://t.me/veDAO\_EN), Discord link (discord.gg/NEmEyrWtjV), Twitter handle (@vedao\_official), and email address (marketing@vedao.com). The background is dark blue with a subtle pattern.

# User Pain Points and Solutions

## User Pain Points

Difficulty tracking fast-changing trends, leading to missed opportunities.

Uneven project evaluations, lack of time for comprehensive review.

Industry projects chaotic, quality ones hard to discern.

## Our Solutions

With veDAO, stay updated in real-time on industry trends and dynamics, keeping pace with the industry's rapid changes.

With veDAO AI, efficiently summarize millions of reviews within a thousand words, enhancing research efficiency.

With veDAO, access expert reviews and real-time smart money signals to seize every Alpha opportunity.

Project Background	3.5	Technical advantages	3.0	Business model	3.5
Product experience	3.0	Market operations	3.5	Project risks	3.0 (Medium) 

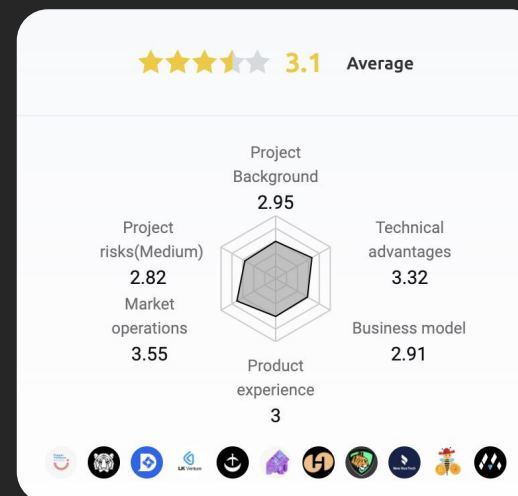

1. From the perspective of project vision: the combination of AI + content, mainly Web3 Game and Metaverse. After the overall experience, it is similar to a generator.

2. Judging from the progress of the project: At present, the project has received financing of 2.8 million US dollars.

3. From the perspective of token economics: the single-token model is adopted, user behavior has an impact on token deflation, and there is also a monthly payment model.

4. From the perspective of operation: 85,000 followers, the community is relatively active.

5. From the perspective of risks and shortcomings: works created by AI have no copyright, and may become one of the constraints that restrict development in the later stage.

## Scoring Dimensions

OnFinality adalah platform infrastruktur blockchain yang memberikan pengembangan alat dan titik akhir API yang boleh diskalakan. Ujian, deploy, dan pemantauan node blockchain dengan cepat dipermudahkan oleh ini. Tim pengembang OnFinality mencipta solusi yang berkuasa walaupun mereka pernah menghadapi cabaran dalam menguruskan infrastruktur blockchain. OnFinality adalah pilihan penting untuk eko sistem blockchain kerana layanan yang andal dan layanan yang terus berkembang.

Twitter KOL Views

ChatGPT help me summarize the Twitter KOL views on this project

Summary

水瓶座

★ **Featured** 简单来说, Friend.tech的本质是构建一个围绕KOL的付费粉丝群, 目前仅有网页APP (但必须在移动端使用), 用户可以通过购买特定KOL的Share与KOL在同一个群组中交流, 也随时可以出售购买的Share, 购买同一KOL的Share的用户越多, Share价格也就越高。

对于粉丝来说, 购买了Share后才可以聊天, 则形成了类似NFT的社区。由于特定KOL的人设, 可以类比传统娱乐业的追星行业, 粉丝的凝聚力极强, 购买了特定KOL Share的粉丝甚至会自发推广KOL, 形成利益共同体。

对于KOL来说, 进入Friend.tech是一个极具吸引力的选择, 可以非常直观的将粉丝群变现, 只需要鼓励粉丝购买Share即可, 而KOL的入驻又将进一步扩大Friend.tech的影响力, 使得更多用户进入, 形成正向飞轮。

总之, 先明确一点, Friend.tech是一个毫无疑问的旁氏游戏, 而旁氏是必然有生命周期的, 原因很简单, Share价格的上升来自于新玩家的接入, 而不是价值创造。然而, 这并不意味着Share没有投资价值, 相反, 旁氏的设计提供了Share价格快速上升的可能性。

share

## Experts' comments

## Earnings Distribution Rules

Have ChatGPT summarize the expert review content of this project for me

Summary

### Strengths:

- Performed well in a bearish crypto market, indicating strong fundamentals
- Unique business model meeting various needs like decentralized yield management
- Strong team and tokenomics design
- Support from major exchanges like Binance Launchpool
- Well-designed incentive mechanisms leading to a positive feedback loop

### Risks:

- Valuation may be stretched, risk of pullback exists
- Continuous token releases could pressure prices
- Illiquid vested tokens also weigh implicitly
- Fierce competition in the ecosystem
- Various risks including market, tech, user education need mitigating
- Overall crypto market still in a downturn
- Regulatory uncertainty

In summary, a neutral stance on Pendle is prudent. Monitor progress and actual business performance. Focus on risk factors and reduce exposure at highs. User education on risks is important. Overall, Pendle shows strengths but merits close tracking given the risks.

  - d) Media updates
  - e) Community reviews
  - f) Smart analysis of on-chain signals
  - g) Providing investment decisions

# AI Trading Assistant & AI Intelligent Advisor

- Consulting AI through conversation
- AI assistant aiding investment decisions
- AI assistant automatically executing trades
- Investment and asset management based on individual preferences

The screenshot displays the veDAO web application interface. At the top, a navigation bar includes links for Projects, Governance, Expert Comments, Ranking, veDAO Institute, Smart investment advisor (highlighted as 'New'), and Other. A user profile icon shows a balance of 0x3..425 and a currency selector set to CN.

On the left sidebar, there is a '+ New Chat' button and tabs for 'Project' and 'Chat'. Below these, a section titled 'Recommendations for the most discussed programs in the circle recently' lists several projects with their respective icons and names: Rocket Pool, Blur, Arbitrum, ZkSync, Optimism, Lens Protocol, Magic Eden, Pendle, and Maverick Protocol.

The main chat area shows a conversation. A user asks: "What are some of the most discussed items in the circle these days?". The AI assistant responds with a summary of the most discussed items on Twitter recently, listing two tables: 'Twitter hottest project' and 'Smart Money Trends'.

The 'Twitter hottest project' table lists the top 5 projects by discussions, KOL, and token rise:

#	Projects Name	Discussions	KOL	Token rise
1	Blur	10780	2184	0.0000123
2	Arbitrum	10780	1312	0.0000123
3	ZkSync	10780	352	0.0000123
4	Optimism	10780	123	0.0000123
5	Memeland	10780	123	0.0000123

The 'Smart Money Trends' table lists the top 5 projects by Smart Wallet Count, Hold Amount, and Token rise:

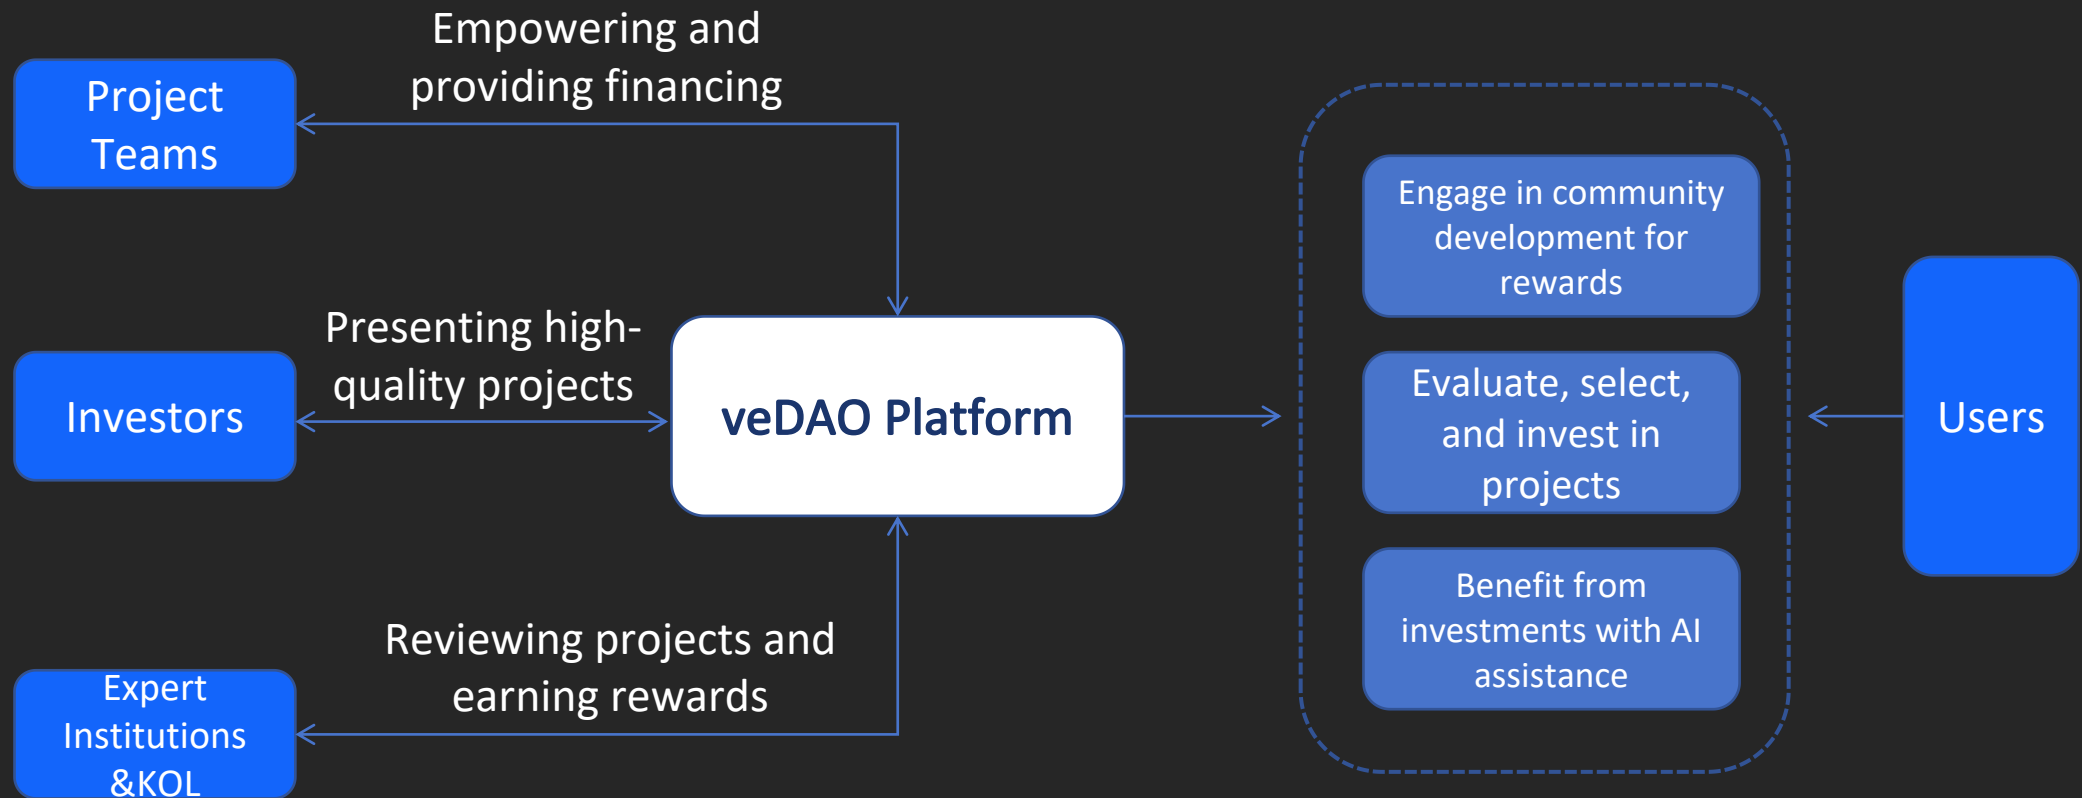

#	Projects Name	Smart Wallet Count	Hold Amount	Token rise
1	Blur	10780	10780	0.0000123
2	Lens Protocol	10780	10780	0.0000123
3	ZkSync	10780	10780	0.0000123
4	Optimism	10780	10780	0.0000123
5	Memeland	10780	10780	0.0000123

The user then asks: "What are the narratives and opportunities that could explode within this year?". The AI assistant provides a detailed response, listing three narratives and opportunities that may have exploded within this year:

- 1, RAW:** the narratives and opportunities that have exploded so far, veteran projects such as MakerDAO and Compound, which entered the RAW track and introduced U.S. Treasuries into DEFI, have given DEFI a huge imagination for the future, bringing about a general rise in veteran DEFI projects.
- 2, LSD:** Ether's LSD narrative is not over, the current market capitalization of the top 5 PoS public chains have a pledge rate of 60%-70% or more, and Ether is currently at about 15%. There is still huge room for growth, and projects in the correspondent LSD track also still have high growth potential.
- 3, Rollup-L2:** Ether's next upgrade Cancun upgraded the core of EIP-4844, Cancun upgraded Rollup-L2 gas fee will be significantly reduced after the upgrade, favoring the entire Rollup-L2 ecological plate.

The user then asks: "Please help me recommend a quality program with a combination of Twitter heat and narrative.". The AI assistant responds with a recommendation for Arbitrum, stating it is a popular Ethereum L2 scaling solution that utilizes Optimistic Rollup technology to increase scalability, speed, and privacy of on-chain contracts, and its developer-friendly design is fully compatible with EVMs. Arbitrum is currently ranked first among all second-tier networks in terms of locked-in capital value.

# Application of DAO

## Trading&Staking

DAO is the tradable and liquid token of the platform, while pledging will get staking benefits

## Applying for Finance

DAO Applying for finance entails pledged DAO tokens, and a failed application will destroy some tokens

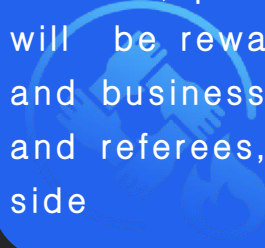

## Become a Voter

After staking DAO, one will become a voter, participating in governance and gaining benefits.

## Repurchasing & Destroying

10% finance of every project will be used for purchasing DAO tokens, of which 3% is destroyed and 3% is stored. Besides, pledging users will be rewarded 2%, and business managers and referees, 1% for each side

## DAO Token Inflation

Get rewarded with DAO tokens for participating in the platform's voting governance

Pledge DAO or LP for Staking Rewards

Get rewarded for other contributing behaviors such as providing expert reviews

## DAO Token deflation

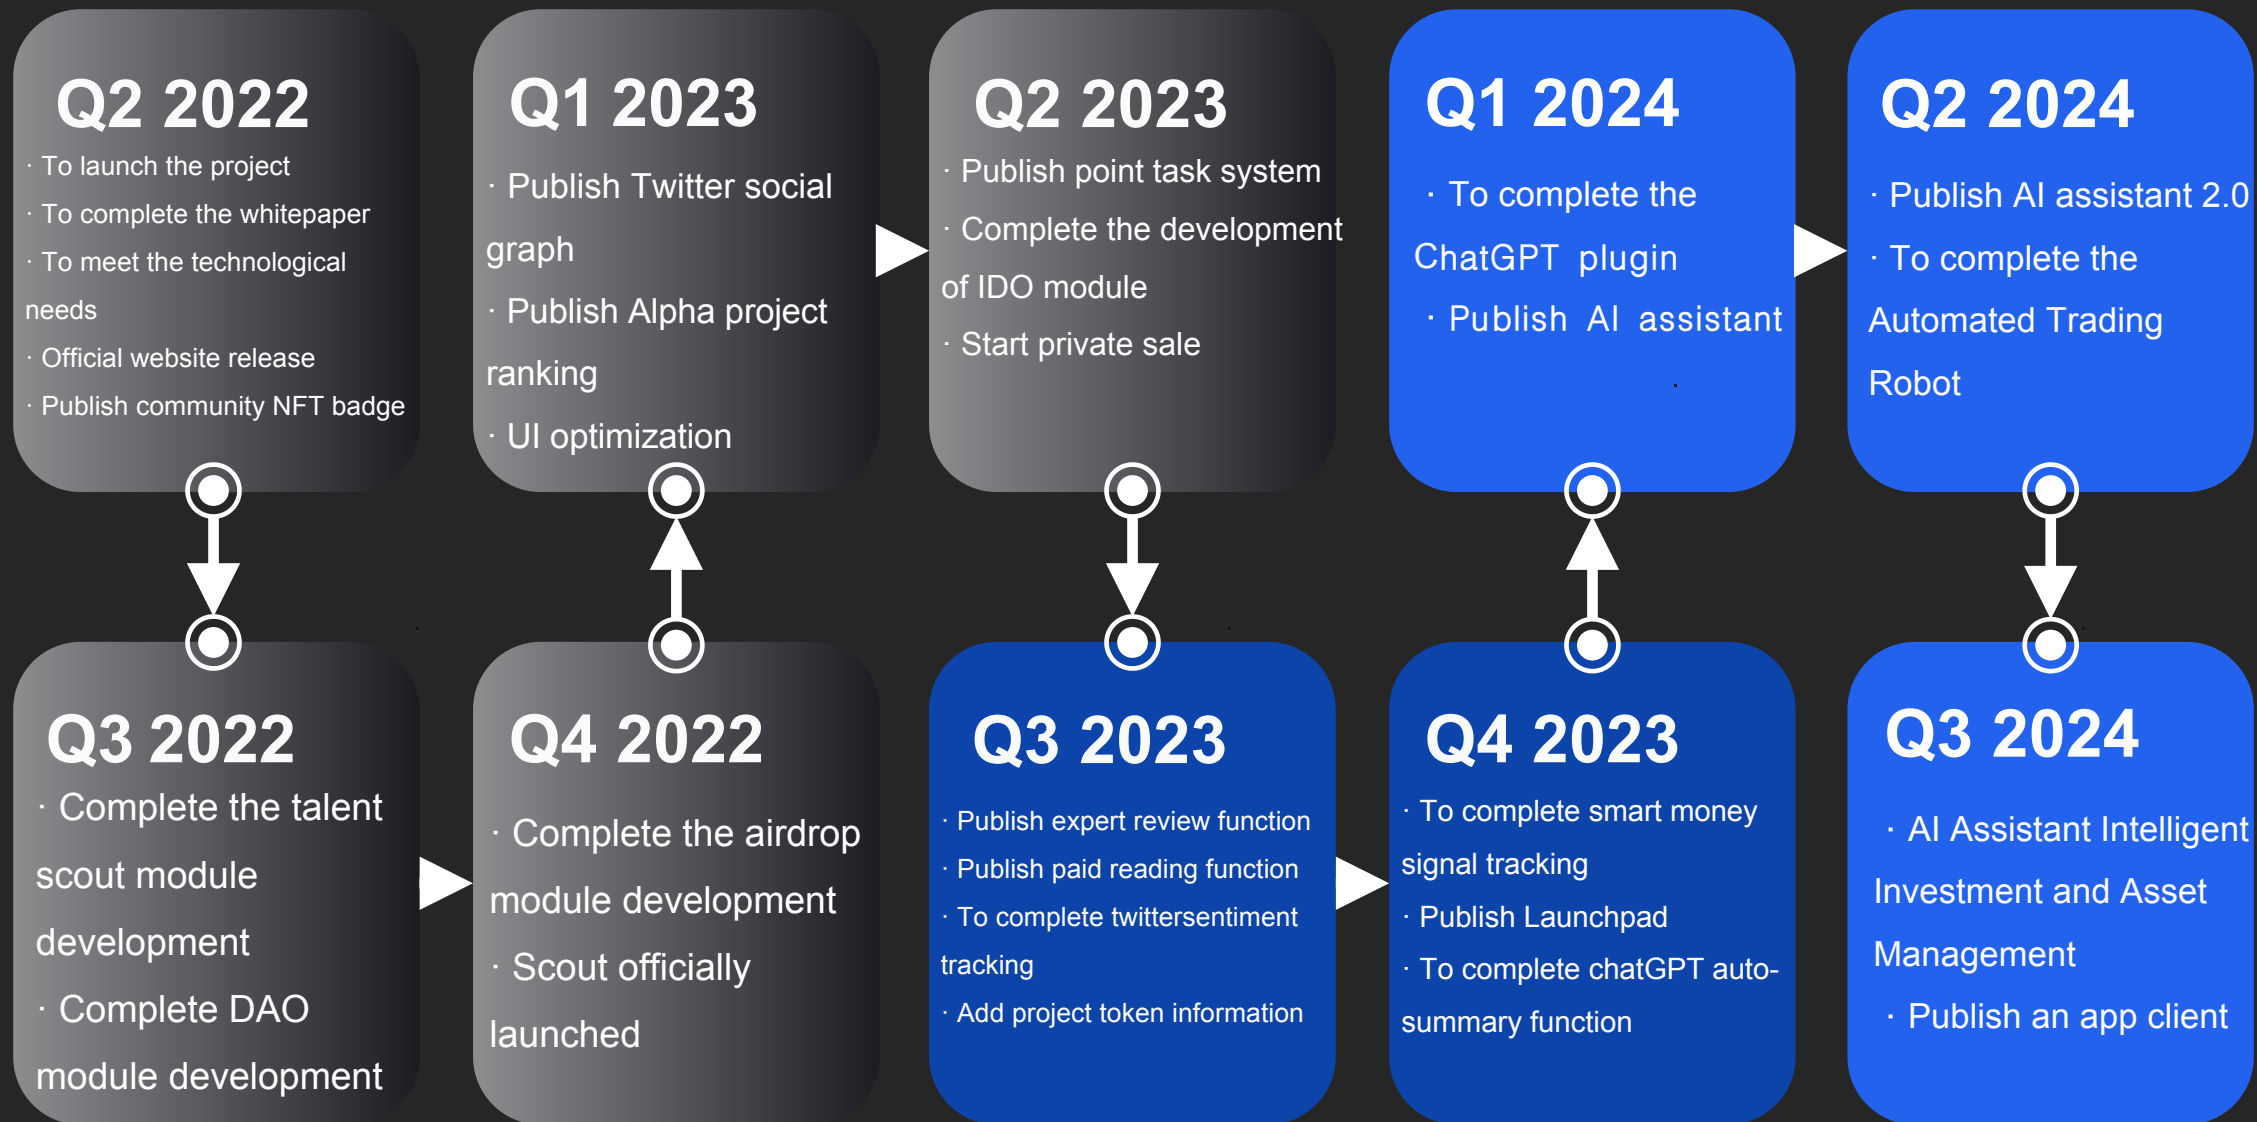

Launchpad revenues, 30% buyback of DAO destruction

Revenue from paid reading, 30% buyback of DAO destruction

Revenue from AI assistant subscription fees, 10% buyback of DAO destruction
