

Web3 Investment Guide

Accurately Capturing Alpha  for a Hundredfold Return

AI-driven Intelligent Investment Advisor

Do you have the following problems when investing in web3?

With so many new projects and tokens to choose from, how do you get started?

When it comes to potential projects, what are the best timing for entry and exit points?

Without understanding fundamental analysis or technical analysis, how can you find good projects?

How do you filter through the overwhelming amount of on-chain data and media information?

Research reports are long and difficult to understand, and there is no time or energy to conduct in-depth analysis, what should you do?

Either you can't grab it or the threshold is high, how should you participate in primary market?

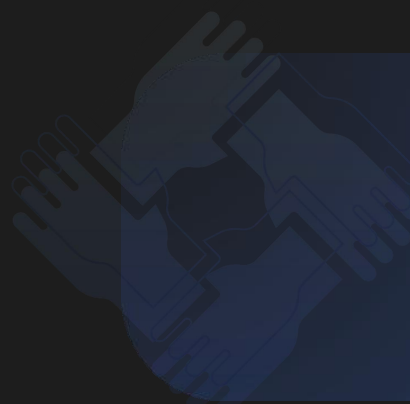

The **challenges** you need to solve are as follows

Quick access to valuable core project information

Follow Smarter Views and Money Now!

Separate valid signals from noise to accurately find Alpha

Get a personal investment advisor for wealth management

Our Solutions

Accurate Alpha capture through data indicators to invest more efficiently and profitably

Provide authentic evaluations of projects by expert committee and communities

Making quick decisions and investments with the help of an AI assistant

Unearthing investment opportunities through social sentiment and on-chain signals

Providing a decentralized and democratic primary market investment and fundraising platform

Our Target Audience

All web3 users, whether organizations or individuals, are our target audience

Provide investment decisions for 1 billion users

Investment organizations find early-stage potential projects through veDAO

Cryptocurrency speculation retail investors discover entry signals through veDAO

Primary Market Investors participate in Launchpad at veDAO

Quality projects receive funding and community support from veDAO

Massive database with real-time updates

veDAO has built and maintains repositories for 5200+ projects

Project descriptions, Funding information,
Social links

Number and ratings of favorable or
unfavorable votes from the community

Security values, Token market,
Smart money position dynamics

Professional reviews and analysis
reports from expert institutions

Social Fans Change Dynamics, KOLs and
Whales Follow Change Dynamics

Real-time views from Twitter KOLs and
media platforms

Terabyte-scale real-time database

Project database covers 70 major web ecosystems and 40 web3 track tags, including 22,000+ Twitter KOLs, 3,700+ investment organizations, 20,000+ whales and smart money addresses, and 6,000+ media information and analysis reports. Maintain real-time updates through community submissions and automated crawling.

Project Background	3.5	Technical advantages	3.0	Business model	3.0
Product experience	3.0	Market operations	3.5	Project risks	3.5

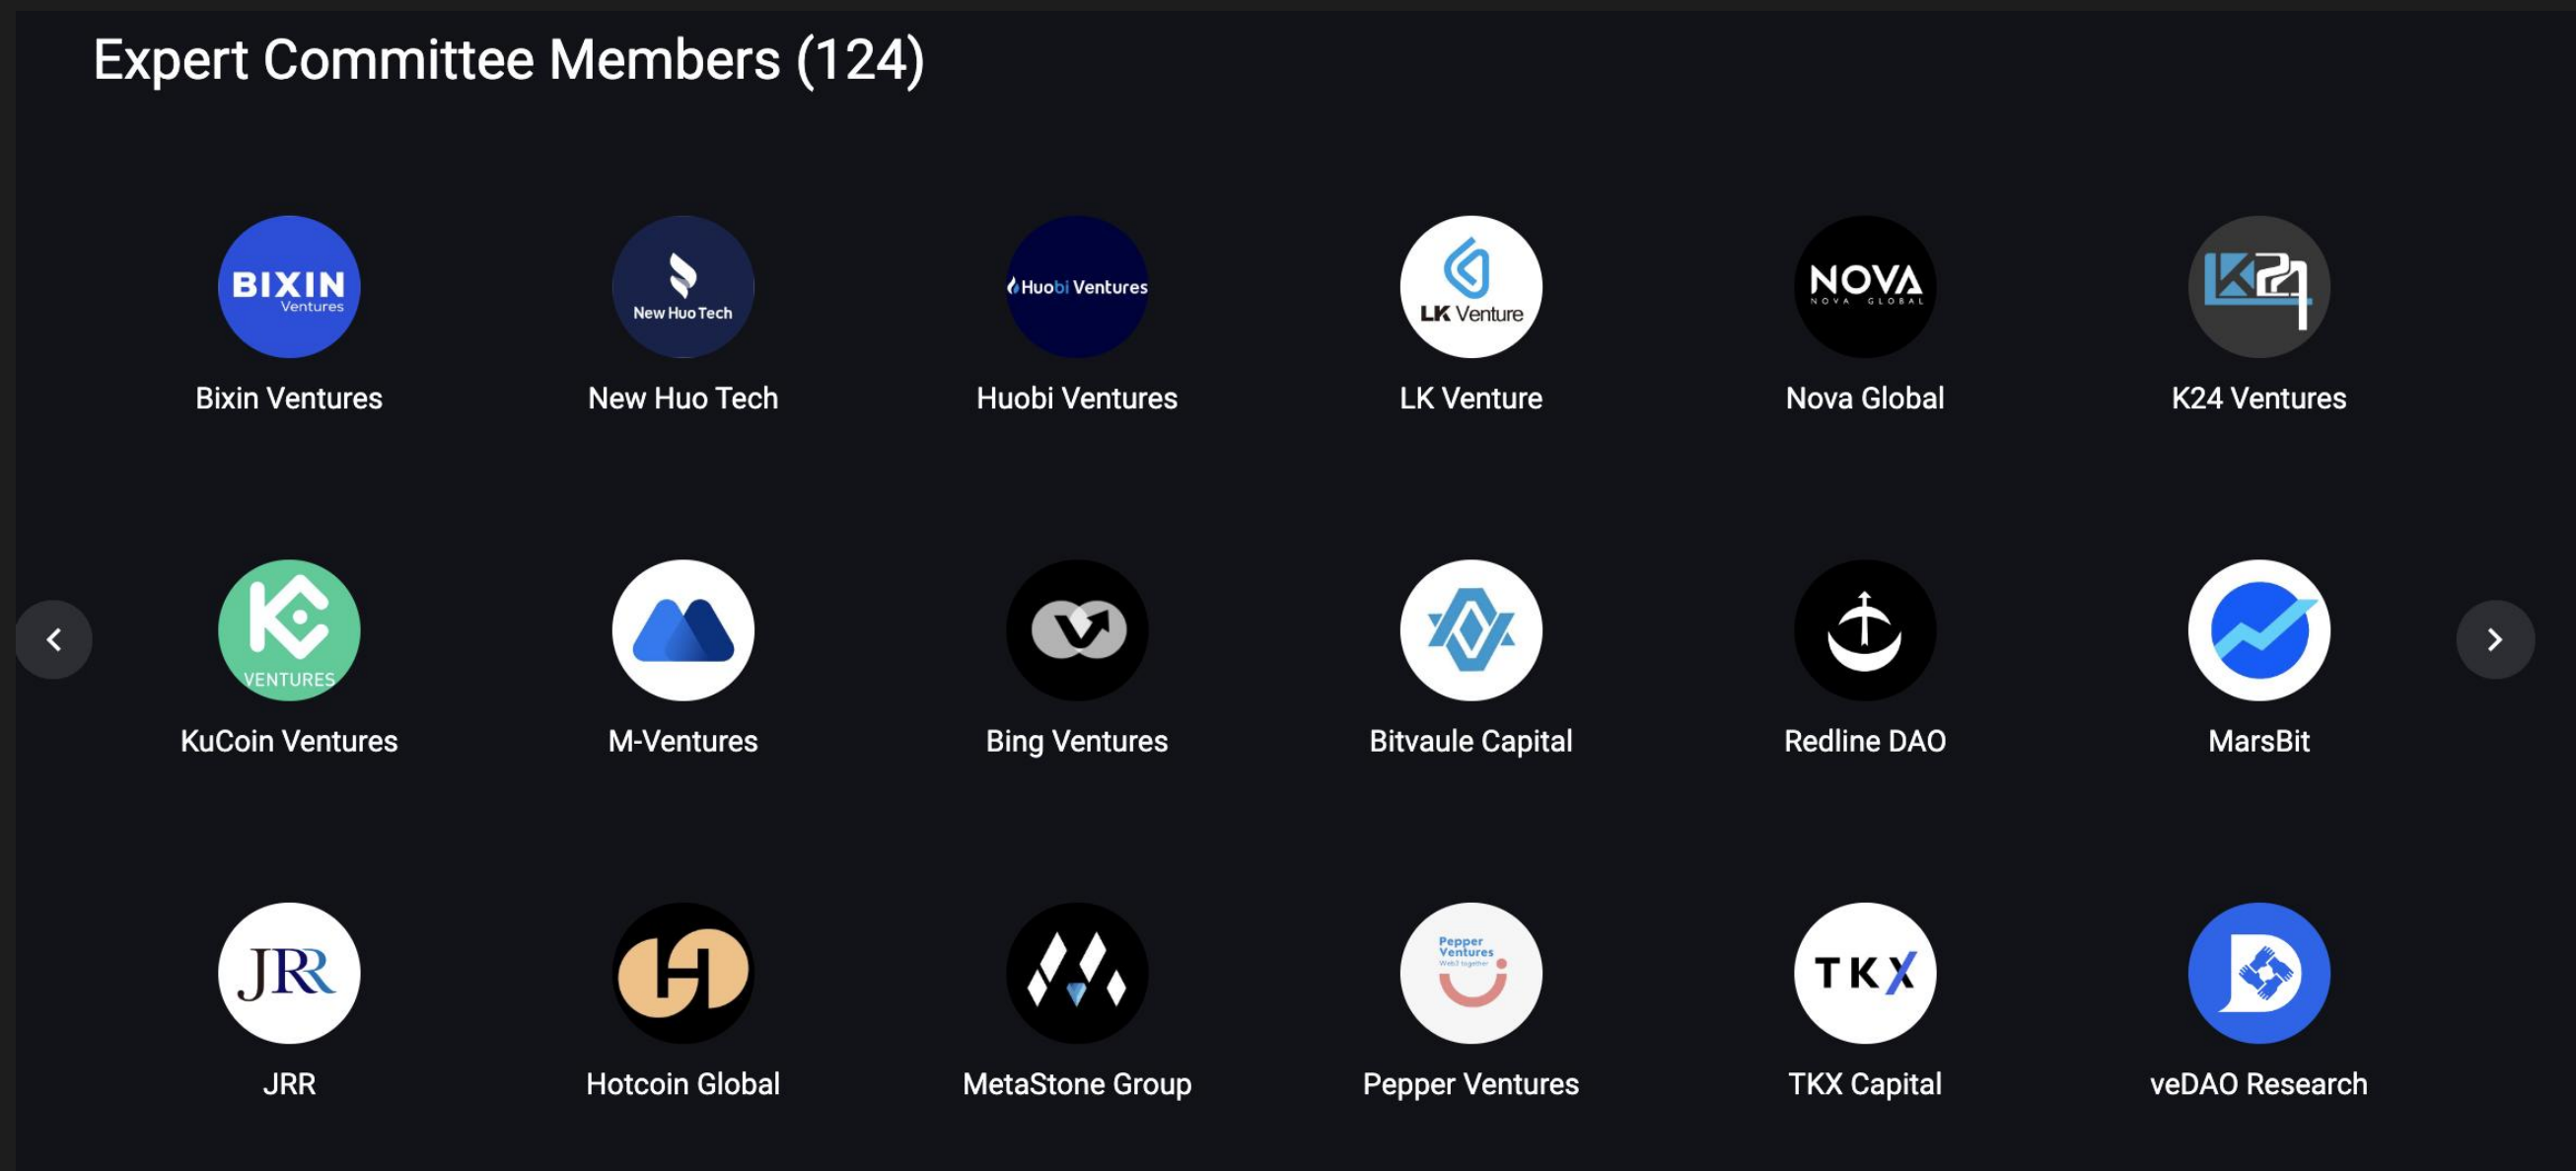

1. From the perspective of project vision: the combination of AI + content, mainly Web3 Game and Metaverse. After the overall experience, it is similar to a generator.
2. Judging from the progress of the project: At present, the project has received financing of 2.8 million US dollars.
3. From the perspective of token economics: the single-token model is adopted, user behavior has an impact on token deflation, and there is also a monthly payment model.
4. From the perspective of operation: 85,000 followers, the community is relatively active....

👍 3

Duties of the Committee

Its responsibilities are to uphold neutrality and objectivity, make comprehensive multi-dimensional evaluation of projects, provide valuable reference opinions for project parties and market participants, carry out thematic seminars and investment analysis exchange activities in combination with its own professionalism, cultivate a professional, efficient, open and transparent The committee will conduct thematic seminars, investment analysis and exchange activities, cultivate a professional, efficient, open and transparent investment and financing community, and accelerate the development of early stage quality projects.

What are the narratives and opportunities that could explode within this year?

The narratives and opportunities that may or have exploded within this year are:

1, RAW: the narratives and opportunities that have exploded so far. veteran projects such as MakerDAO and Compound, which entered the RAW track and introduced U.S. Treasuries into DEFI, have given DEFI a huge imagination for the future, bringing about a general rise in veteran DEFI projects.

2, LSD: Ether's LSD narrative is not over, the current market capitalization of the top 5 PoS public chains have a pledge rate of 60%-70% or more, and Ether is currently at about 15%. There is still huge room for growth, and projects in the correspondent LSD track also still have high growth potential.

3, Rollup-L2: Ether's next upgrade Cancun upgraded the core of EIP-4844, Cancun upgraded Rollup-L2 gas fee will be significantly reduced after the upgrade, favoring the entire Rollup-L2 ecological plate.

Please help me recommend a quality program with a combination of Twitter heat and narrative.

Arbitrum is the popular Ethernet L2 scaling solution. It utilizes Optimistic Rollup technology to increase the scalability, speed, and privacy of on-chain contracts, and its developer-friendly design is fully compatible with EVMs. Arbitrum is currently ranked first among all second-tier networks in terms of locked-in capital value.

Arbitrum is the popular Ethernet L2 scaling solution. It utilizes Optimistic Rollup technology to increase the scalability, speed, and privacy of on-chain contracts, and its developer-friendly design is fully compatible with EVMs. Arbitrum is currently ranked first among all second-tier networks in terms of locked-in capital value.

Fairer primary market investment.

veDAO Provides Non-Hosted, Democratic, Autonomous Launchpad Platform

Low threshold: Anyone can participate without needing approval.

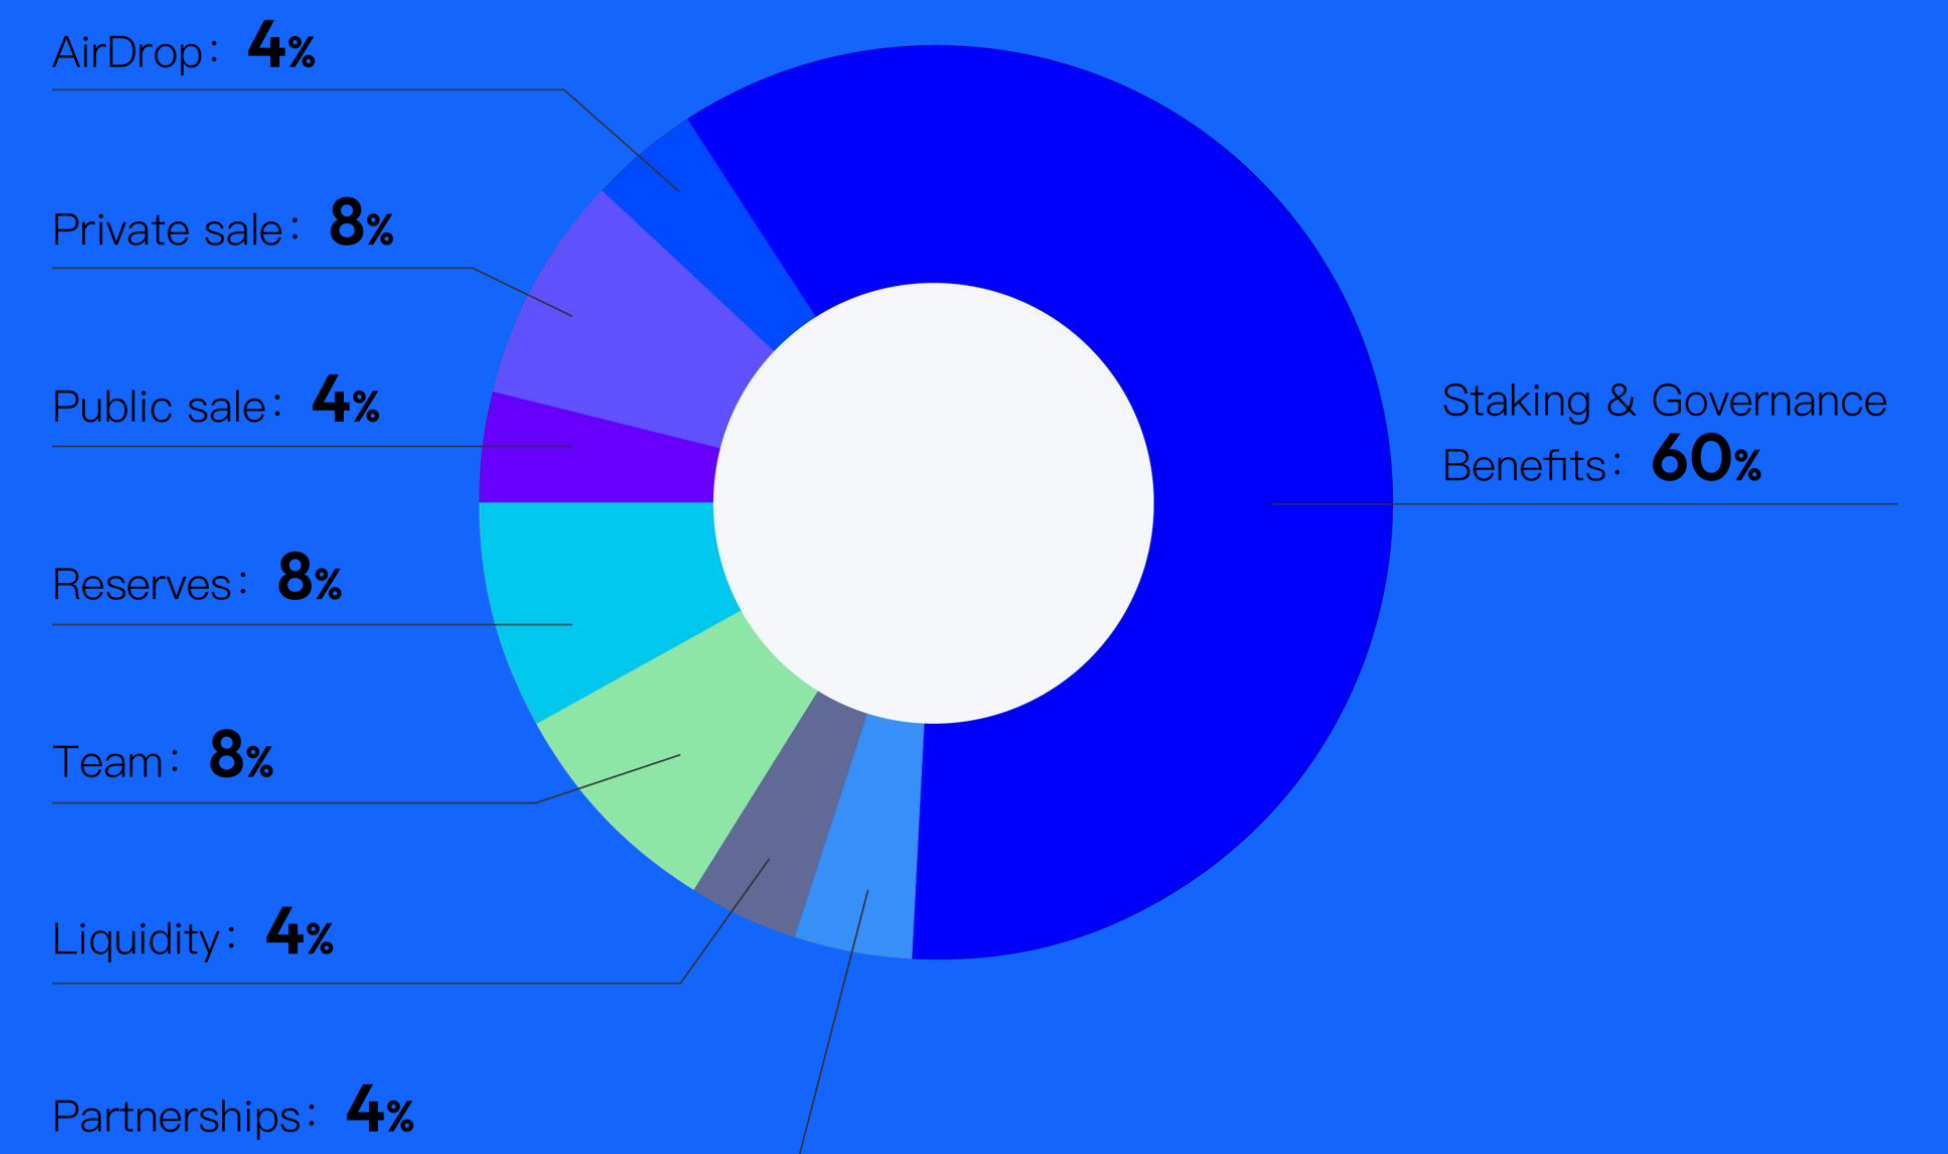

Equitable distribution of quota:

- When the number of participants is smaller than that of selling board lots, everyone will win a lot at least;
- When the number of participants is bigger than that of selling board lots, more veDAO and funds will bring more lots.

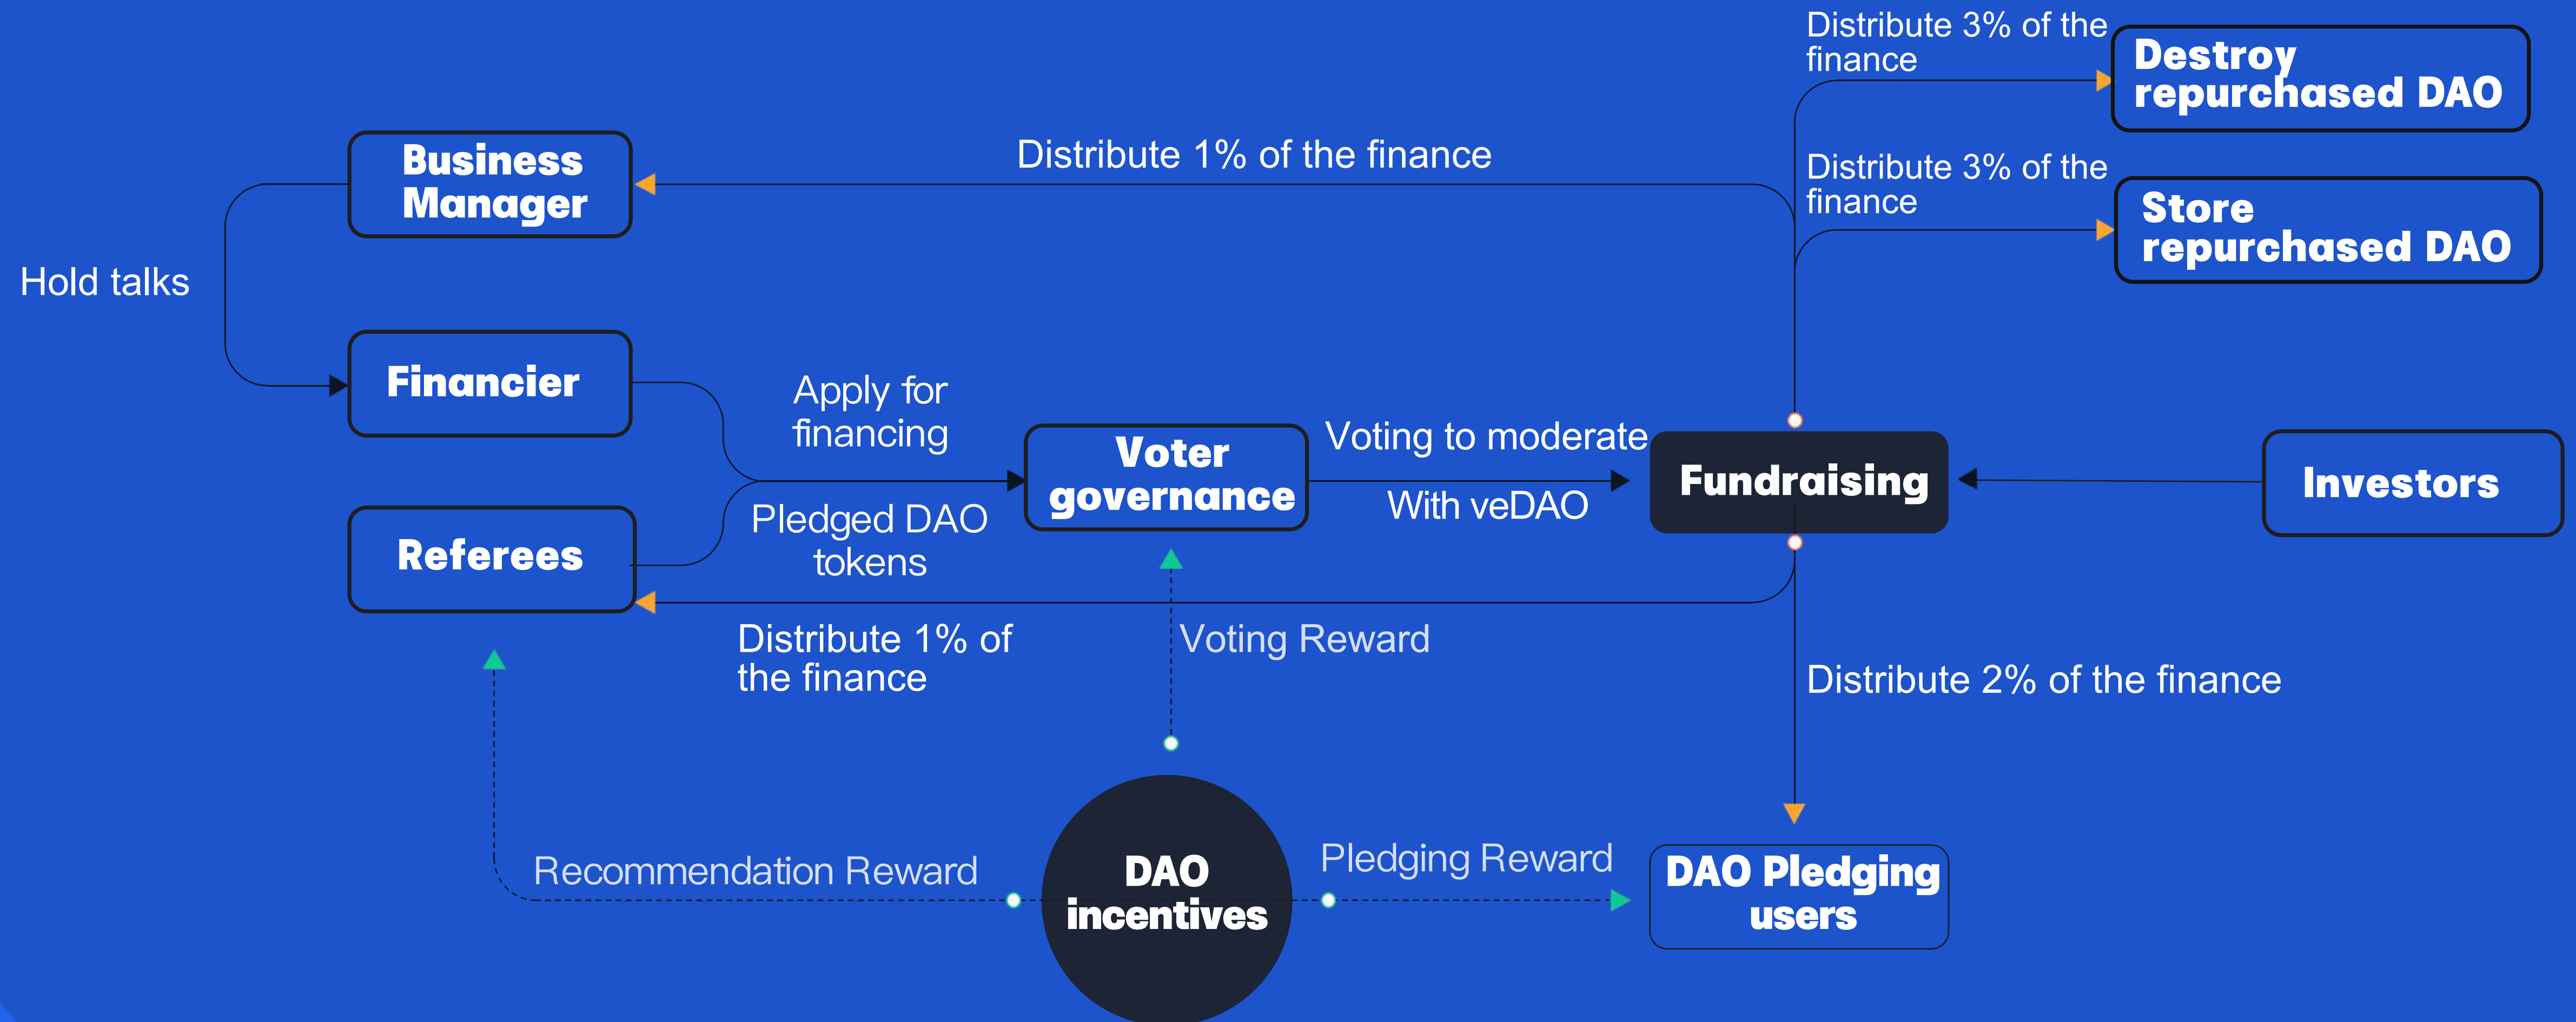

veDAO will distribute 1 Billion tokens named \$DAO

Details	Share	Number of DAO	Cycle for Distribution

Economic model

Operational Mechanism

Application of DAO

Trading&Staking

DAO is the tradable and liquid token of the platform, while pledging will get staking benefits.

Applying for Finance

DAO Applying for finance entails pledged DAO tokens, and a failed application will destroy some tokens

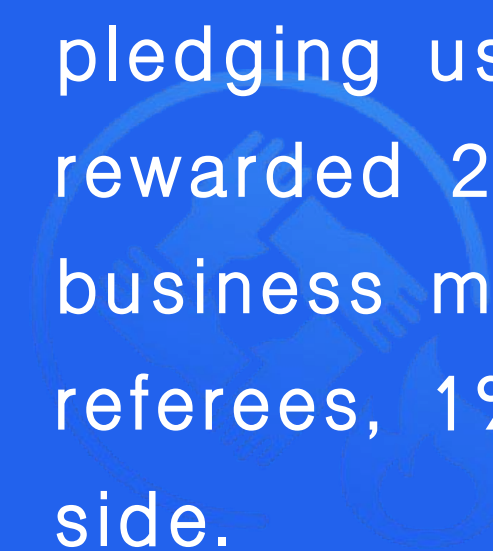

Become a Voter

After staking DAO, one will become a voter, participating in governance and gaining benefits.

Repurchasing & Destroying

10% finance of every project will be used for purchasing DAO tokens, of which 3% is destroyed and 3% is stored. Besides, pledging users will be rewarded 2%, and business managers and referees, 1% for each side.

Application of DAO

Pro Premium Equity

Locked position DAO to get the platform Pro Premium benefits, the more the amount of locked position, the higher the benefits, the right to view the advanced data.

DAO Token Inflation

Get rewarded with DAO tokens for participating in the platform's voting governance

Pledge DAO or LP for Staking Rewards

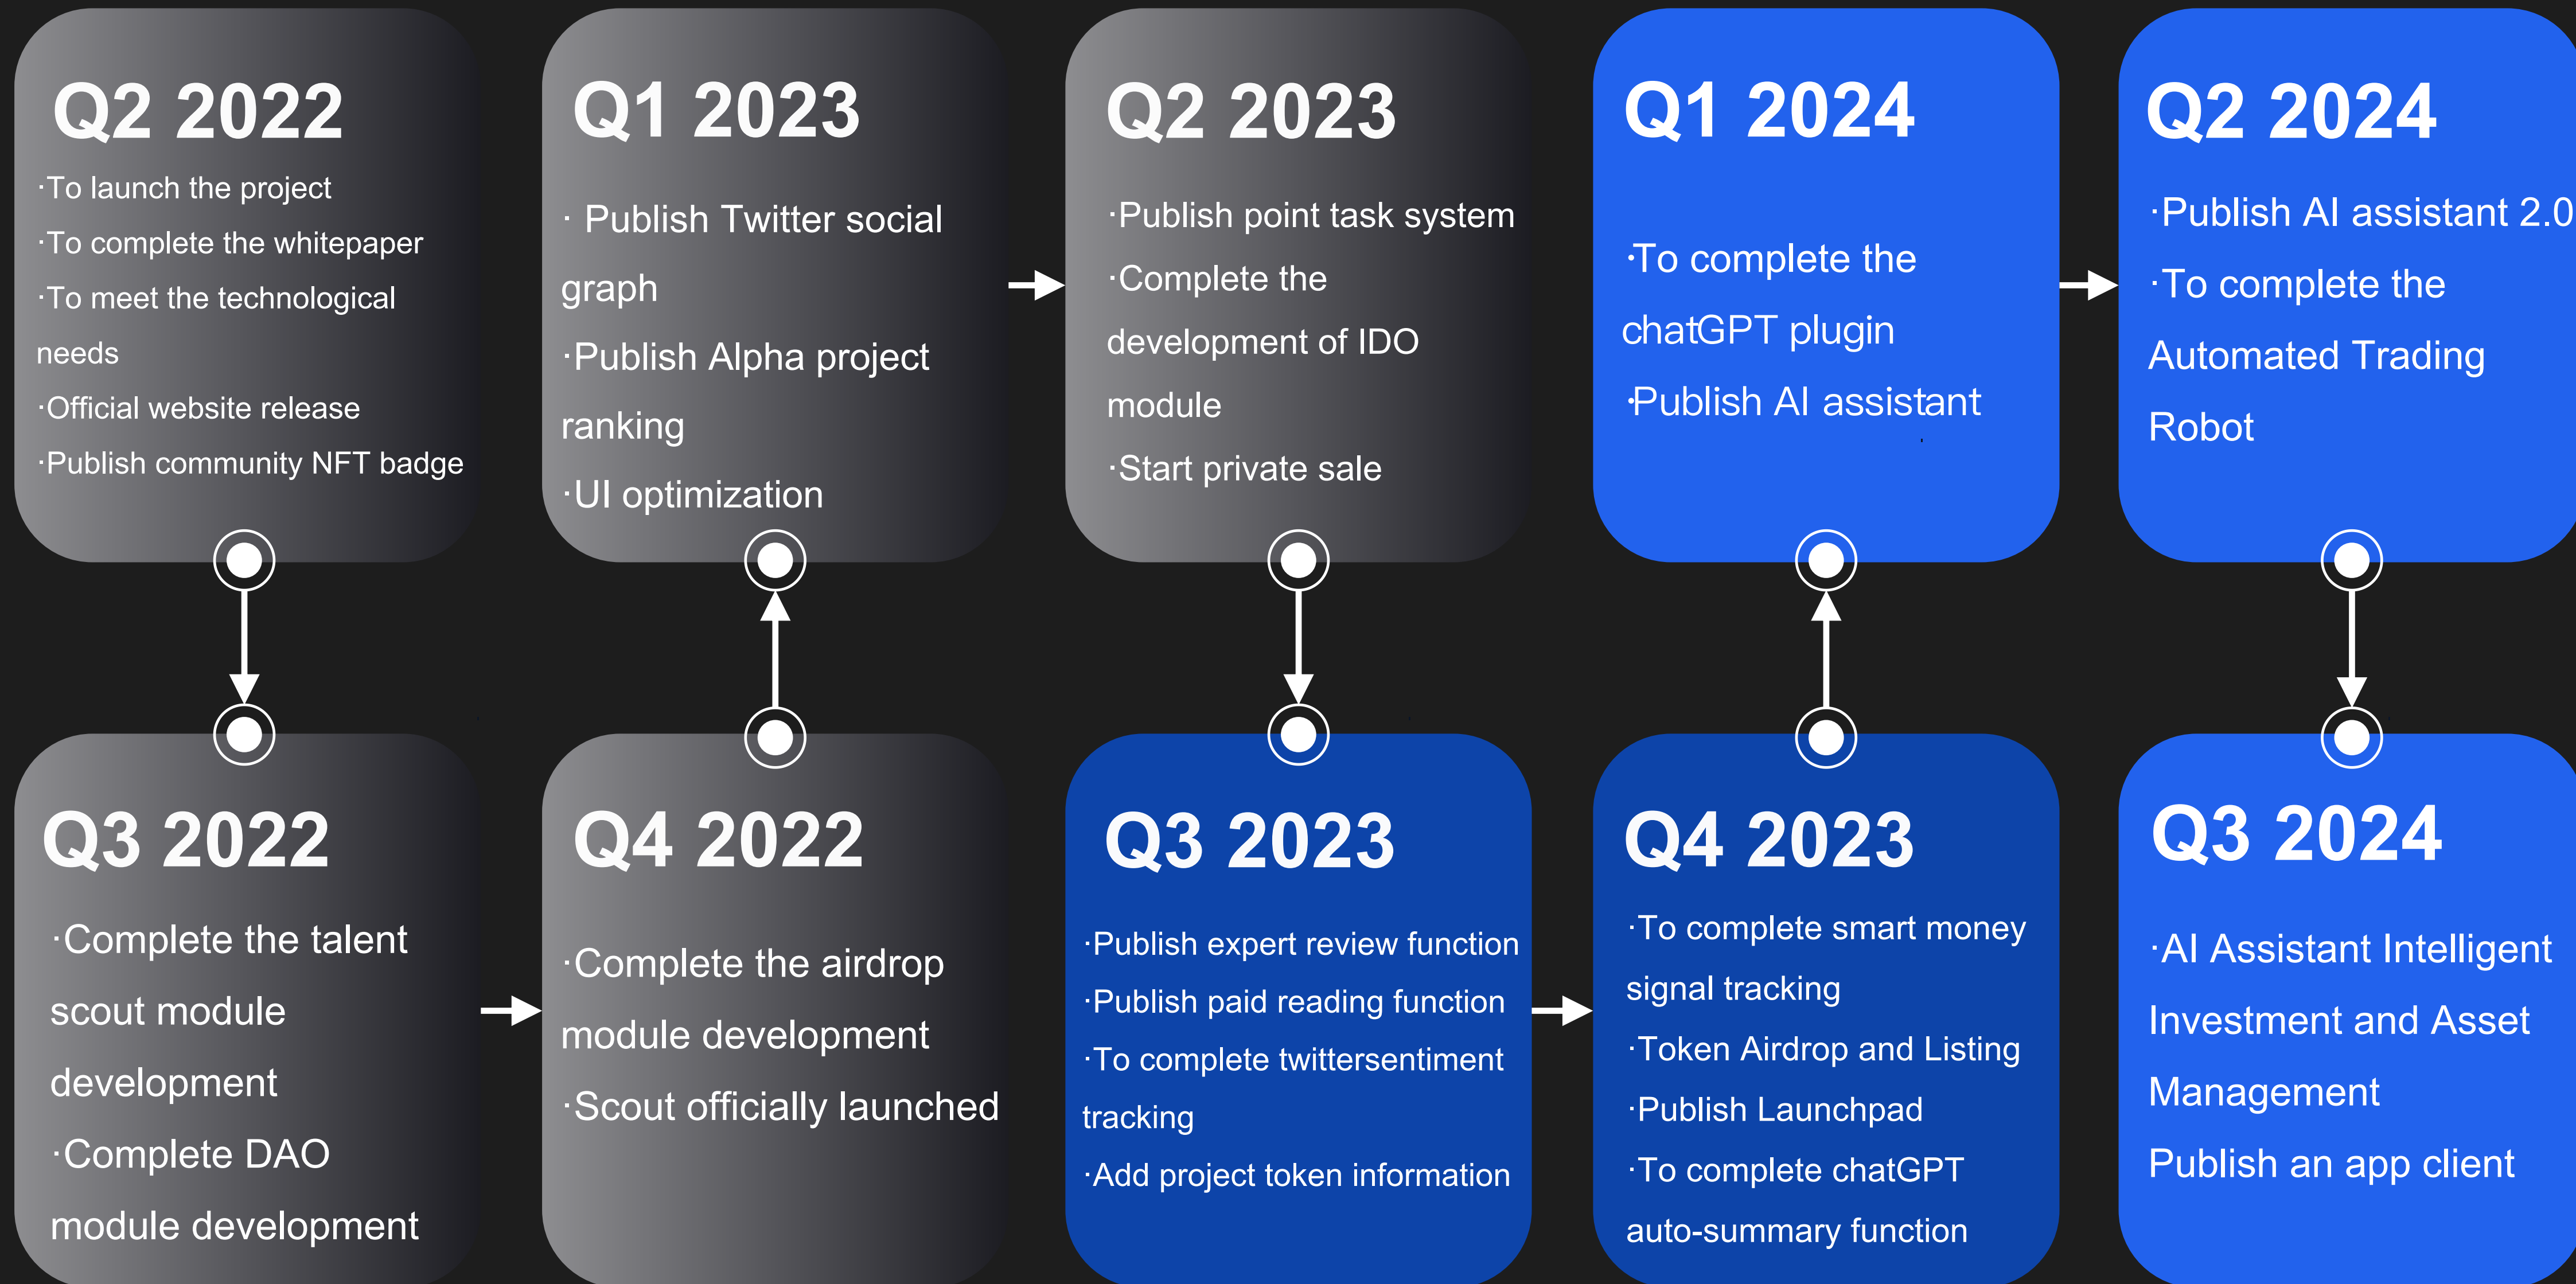

Get rewarded for other contributing behaviors such as providing expert reviews

DAO Token deflation

Launchpad revenues, 30% buyback of DAO destruction

Revenue from paid reading, 30% buyback of DAO destruction

Revenue from AI assistant subscription fees, 10% buyback of DAO destruction

Growing user approval

veDAO is highly recognized and appreciated by the market, whether it's an organization or an individual
